

Hi, my name is Rudy Botello and I hope this letter makes a small difference in congress. Satellite Radio believe it or not has changed me and my familys life for the better. In our spare time we would sit and watch movies which was ok but now things are different. We set the satellite radio to our favorite station and either play in the yard or work around the house as a family creating more bonding moments.

I wish the red tape and large corporations would just let satellite radio alone and its pretty obvious the radio stations don't want them around but you know what it's america! This is what makes us Americans so great, the innovative entrepreneurial spirit!

Long Live Satellite Radio!

Rudy Botello
